Abstract (en)
[origin: US4725921A] A hinge-mounted labeling panel having two final positions for use on plug-in modules in subassemblies of a mechanically modular system. According to the invention, a panel portion of the labeling panel is hinge-mounted on one end to a guide crossbar of the subassembly, such as a card cage, and on the other end is fitted with a lock. The labeling panel thus has a simple design, and also has two flat sides both of which can be used to attach the desired labeling.
