Abstract (en)
[origin: EP0215568A1] A lift-off hinge assembly including a first hinge leaf (14) hingedly connected to a second hinge leaf (12), the hinge connection between the hinge leaves being defined by at least two hinge formations (18) spaced apart along the pivot axis of the hinge assembly, each hinge formation including a hinge pin (19) positioned on one hinge leaf and which is journaled in the other hinge leaf, the hinge pins of all the hinge formations being arranged to co-operate with their respective journal (20) to enable the hinge pins to be simultaneously withdrawn from their respective journals by moving the hinge leaves apart along the pivot axis.
