Abstract (en)
[origin: US4828289A] The invention relates to a book and is characterized in that the spine of the book has a shape different from a straight contour line, that fixing elements (3) for the cover (1) and the leaves (2) of the book are arranged inwardly of the edge (4) of the book, and that at least the front cover (1) is provided with a bending line (5) at the side of the fixing elements (3) opposite the edge (4) of the book. This makes it possible to give the book the shape of a children's toy (ball, doll, toy animal, car, or the like) projected on a plane.
