Abstract (en)
[origin: EP0216416A2] Improved phase stable liquid compositions, particularly for use as hard surface cleansers, comprise a mixture of sodium C12-C18 paraffin sulfonate (NaPS) and sodium salt of linear alkyl benzene sulfonate (LAS), terpenes, benzyl alcohol, acrylic acid polymeric thickeners, abrasives and viscosity enhancer compounds. The compositions are viscous, substantially phase stable and provide excellent cleaning of both greasy and particulate soils from hard surfaces without streaking or filming.
