Abstract (en)

1. A barrier (2) of the type comprising a certain number of posts (3a, 3b, 3c) disposed at regular intervals, to one face (7) of which rails (4) are affixed each post comprising in combination a metallic sheet (6) folded so as to form a flat front face (7) intended to support the rails (4), and a profile (12) of U section of height corresponding to that of the post, and the spacing of the limbs of the U of which is less than the width of the sheet that forms the front face and the bedplate, this metallic profile (12) being fixed to sheet (6) by welding to the front face (7), characterized in that the metallic sheet (6), forming the front face, is folded in such a way as to form a lower return (8) that constitutes the bedplate for fixation to the ground, the metallic profile (12) also being fixed by welding to the bedplate (8).

Abstract (fr)

Dans cette barrière, chaque poteau comprend en combinaison une plaque métallique (6) pliée de façon à former une face avant plane (7) destinée au support des lisses (4), et un retour inférieur (8) constituant la semelle de fixation au sol, et un profilé (12) de section en U, de hauteur correspondant à celle du poteau et dont l'écartement des ailes du U est inférieur à la largeur de la plaque formant la face avant et la semelle, ce profilé métallique (12) étant fixé sur la plaque (6) par soudage sur sa face avant (7) et sa semelle (8).
