Abstract (en)
[origin: ES8707142A1] Apparatus for conveying a stack of bags from a bag stacking station to a downstream processing station. The apparatus includes a conveyor belt, and a carriage that is movable in a conveying direction, the carriage including a belt clamping device to clamp the carriage to the belt, the carriage including a bag stack clamping device for clamping a stack of bags to the belt. Movement of the carriage simultaneously moves the conveyor belt and a stack of bags in the conveying direction, whereupon the belt clamp and the bag clamp are released, and the carriage is returned to the bag stacking station.
