Abstract (en)
1. Protective fence with automatic release in case of emergency, comprising at least one group of individual panels (B, C, D) each disposed between two consecutive posts in a series of aligned posts (1), each panel being hinged around an axis on one of the adjacent panels, characterized in that facing the hinge post the panels are equipped with a mechanism (11, 12) for locking the adjacent panel in the closed position, which is retractable and can release the said adjacent panel on rotation of the panel on which the said mechanism is disposed, and in that the only panel in the said group which is not connected to an adjacent panel, i.e. one of the end panels (B), can be locked in the closed position by a remote control device (4).

Abstract (fr)
L'invention a trait à une grille de protection à deverrouillage automatique en cas de panique, comprenant au moins un groupe de panneaux individuels (B,C,D,) disposés chacun entre deux poteaux consécutifs d'une série de poteau alignés (1), caractérisée en ce que chaque panneau est articulé autour d'un axe porté par l'un des poteaux adjacents et porte, au droit du poteau d'articulation, des moyens (11,12) d'accrochage et verrouillage en position fermée du panneau adjacent, susceptibles de s'escamoter et de libérer ledit panneau adjacent lors de la rotation du panneau porteur desdits moyens et en ce que l'un des panneaux d'extrémité dudit groupe (B) est verrouillable en position fermée par un dispositif à commande à distance (4). Application notamment aux grilles de protection dans les lieux publics.
