Abstract (en)  
[origin: EP0218103A1] 1. Anti-theft device for a floating body (1), especially a surfboard, which has tapering ends (9, 10), the anti-theft device having receiving parts for these ends and rope sections which engage with the receiving parts and which can be connected to one another via a lockable apparatus, characterized in that the receiving parts are formed from loops (7, 8) directly formed from the rope sections (4a, 4b), and in that the rope sections (4a, 4b) can be displaced with respect to one another in a securing body (12) for the purpose of adjustability and can be fixed in the adjusted position.
