Abstract (en)

[origin: EP0218489A2] 1. A projectile launcher with two parallel barrels mounted tiltably with respect to the stock, in which said barrels (1) are carried by a table (3) mounted pivotally at one end of a beam (6), characterized in that the other end of this beam is carried by a tilt block (4) fixed to the stock and in that said table (3) is of a shape such that when the launcher is in the firing position the table (3) covers said beam (6) thus at least partially concealing the latter.
