Abstract (en)
[origin: WO8606091A1] A briquette produced by combining sawdust and a carbonaceous material such as coal, coke, charcoal or coalchar in a ratio of 1:1 to 1:6 and pressing the mixture at a pressure in excess of 150MPa and at a temperature of between 120<o>C and 285<o>C without the use of a binder. The moisture content determines the time required for the pressing operation and is preferably within the range of 10% to 14% by weight.
