Abstract (en)
[origin: US4693180A] An impact or percussion detonator including a detonator cap which is piercable by a striker or firing pin actuated by a spring force from the rear end of the detonator, including a mechanical retarding or delay arrangement incorporating blocking members which, in their blocking position are located, on the one side, in recesses provided in the striker and on the other side, in recesses provided in a detonator component. The detonator component is constituted of an axially movable securing sleeve, and a recess which receives the blocking members is provided a base member fastened to a housing of the detonator at a distance in the direction towards detonating.
