Abstract (en)
[origin: EP0219176A2] Transport and display packing made from a foldable material, for instance cardboard, provided with a tubular base and a box-shaped body positioned on top of the base for containing commercial goods, whilst the base is provided with two transverse folding lines running parallel to the basal plane of the foot, so that the base which is foldable along the longitudinal folding lines can be fitted snugly against the body, of such a design that the entire packing is made from a single plane sheet, with each section of the packing being continuously connected through other sections to each other section of the packing, and in which substantially all of the plane sheet surface is utilized with a minimum of wastage.
