Abstract (en)
[origin: EP0219205A1] A battery powered electronic ignition generator is disclosed comprising a housing (2) containing a printed circuit board (3) on which is contained a pulse generating circuit (not shown) and a battery/switch assembly (5). The battery/switch assembly (5) consists of a housing (6) containing a battery (9) and a switch operating plunger (11) which operates in conjunction with the battery (9) in order to make or break an electrical circuit to the battery (9), the plunger (11) being removable for battery changing purposes.
