Abstract (en)

[origin: EP0219633A1] 1. Injection-moulded shoe cap made of thermoplastic for safety shoes, consisting of a reinforced front wall (2) with reinforced side walls (3) adjacent on both sides, the upper edges of which are joined by a plate (4) and the lower edges of which have edge strips (5) which can in turn be joined via a bottom bar (6) or at least partly constructed as a bottom plate (7), characterized in that the reinforcement of the front wall (2) and of the side walls (3) in the edge region of the plate (4) is formed at the top by a bulge (9) which is raised above the plate and at the same time is a stiffening for the corner (8) which turns at that point.
