Abstract (en)

1. A display packaging for glass and similar articles formed from a blank (10 ; 30) of foldable material, which is cut out and folded to form a receptacle, said blank comprising a rectangular panel (3) forming a bottom wall of the receptacle, first and second flaps (4 and 5) which are approximately of rectangular shape, which adjoin respectively the major sides (8 and 9) of the rectangular panel (3) and which form the side walls of the receptacle, third and fourth rectangular flaps (6 and 7) which adjoin respectively the minor sides (11 and 12) of the rectangular panel and which form the end walls of the receptacle, a first pair of securing tabs (13 and 14) which adjoin respectively two opposite sides (17 and 18) of one (4) of the first and third flaps (4 and 6), a second pair of securing tabs (15 and 16) which adjoin respectively two opposite sides (19 and 21) of one (5) of the second and fourth flaps (5 and 7), the two pairs of securing tabs serving to secure the first and second flaps (4 and 5) to the third and fourth flaps (6 and 7), a retaining tab (26), which is cut out of the third flap (6) and which can be folded towards the interior of the receptacle so as to retain one end of an article contained therein, retaining means (28) for retaining the other end of said article, said retaining means comprising a fifth flap (28) which is approximately of rectangular shape and which adjoins the outer side (31) of the fourth flap (7) which is parallel to the minor side (12) of the rectangular panel (3), characterized in that said retaining means (28, 43, 44) also comprise two tabs (43 and 44) which adjoin respectively the minor sides (45 and 46) of the fifth flap (28) and which are perpendicular to said outer side (31) of the fourth flap (7), and in that said tabs (43 and 44) are secured respectively to the outer surface of the first and second flaps (4 and 5) forming the side walls of the receptacle.

Abstract (fr)

Dans cet emballage-présentoir en forme de barquette, comprenant une paroi de fond (3), deux parois latérales (4 et 5) et deux parois d'extrémité (6 et 7), l'une des extrémités de l'article contenu dans la barquette est retenue par un rabat (28) qui est solidaire de la paroi d'extrémité (7) et qui est pourvu de deux pattes (43 et 44) qui sont rabattues de 90° et fixées aux parois latérales (4 et 5) de la barquette.
