Abstract (en)
[origin: EP0221407A2] 1. Clothes hanger comprising a bow-shaped body of wood, plastics or the like, and a hanging hook (1), which is bent from a profile wire, preferably a round wire, is provided at its end with a groove-like profile (5) with a groove shoulder (9) projecting over the circumference of the profile wire and said end is fixed to the bow-shaped body by knocking in, characterized in that the profile (5) is formed from slots (6) which do not pass all round, whose slot bottom (8) is linear and essentially follows a secant of the wire cross-section and having a different length over its width.
