Abstract (en)
[origin: EP0221420A2] The service trolley, which is intended, in particular, for room service in hotels, has a frame with four vertical frame posts (1, 2) which are provided at the bottom end in each case with a wheel (5). In the frame, a table top (3), which contains a heat storage insert (29), can be swivelled about a horizontal table swivel axle (6). The two front frame posts (2) are each connected in a swivelling manner to the adjacent rear frame post (1) via bars (7, 8) and can be swivelled about a vertical axis in order to collapse the service trolley. For this purpose, the table top (3) is detached from the front frame posts (2) and swivelled downwards. <IMAGE>
