Abstract (en)

[origin: EP0221568A2] The subject of the invention is a turbine for mixing a combustion mixture used for spark-ignition, internal-combustion engines and composed of air or air, fuel and exhaust gas. The turbine as per the present invention consists of a body 1 with exhaust gas and air jets and an impeller mounted therein, formed from blades 3 and bars 4 secured to hub 2 and being radially spaced thereto. In the body 1 there are nozzles 5 and 6 for supply of air and exhaust gas. Blades 3 are bent on their periphery relative to their plane.
