Abstract (en)

[origin: EP0221800A1] 1. A support formed on the one hand, by a slotted cage (2) intended to contain at least one water-soluble product (3), a colorant in particular used for the disinfection and deodorisation of toilet bowls and, on the other hand, by a hook (5) allowing the slotted cage (2) to be suspended on the edge of a toilet bowl, characterised in that the water-soluble product (or products) (3) is (or are) disposed at the bottom of a container (4, 104) wherein it (or they) is (or are) held, the said container (4, 104) being open in its region on the opposite side to the said bottom and being mounted in the slotted cage (2), so as to be capable of swivelling on itself inside the said slotted cage (2) around an axis substantially parallel to the median plane of the said bottom, the centre of gravity of the unit constituted by the container (4, 104) and the product or products (3) contained therein being situated at a distance which is not zero from the said axis of swivelling on the side of the bottom of the container (4, 104).
