Abstract (en)

[origin: EP0221840A2] Method and device for gluing print carriers (26), for example self-copying sets, address stickers and the like, to an endless carrier web (18). For this, the carrier web is held tensioned between two transport rollers (15, 16) and is guided via a counterpressure roller (14). Underneath a preceding driving roller (13), glue spots (48) are applied to the carrier web by means of a plurality of glue nozzles (22) located next to one another. The print carriers (26) to be glued are conveyed onto the carrier web by means of a feed (11), brought to a synchronous speed by braking rollers (25) and glued at the glue spots (4) by means of a pressure device (32, 33). <IMAGE>
