Abstract (en)

1. Burner support plate for cast iron boilers including at least one set of two lined up hooks forming a vertical housing for the threading of the said plate axis of rotation, characterized in that each plate has two not adjacent half flanges and are issued from foundry with the said plate without toolings, the first half-flange (2a) the concavity of which is against the external side of the plate is forming a half-housing, the half-flange (2b) the concavity of which is against the internal side of the door is forming a second half-housing ; and in that a stop (5) issued from foundry with the burner support plate is lined up with the two hooks.

Abstract (fr)

L'invention porte sur une plaque support de brûleur pour chaudière en fonte, caractérisée en ce qu'elle comporte au moins un élément venu de fonderie du type (cavité (6), gonds (2), demi-bride (3)) apte à recevoir un élément complémentaire sans nécessiter d'usinage. Application : chaudières en fonte
