Abstract (en)
[origin: WO8606641A1] A clamp (10) for holding an article (22) to an object including a base means (12) for adhering the clamp to te object, a flap (20), securing means for securing the flap to the base means with the article positioned therebetween and resilient pad means having an adhesive surface for contacting the article. The securing means includes a first holding means (14, 44) for holding a first portion (20) of the flap and a second holding means (16, 46) for holding a second portion (23) of the flap. Both holding means may be releasable. The second holding means is spaced from the first holding means a sufficient distance along the flap for the article to lie between them. Resilient adhesive surfaces are provided on the flap and base means for contacting and adhering the article.
