Abstract (en)  
[origin: EP0223241A2] Installation for controlling the temperature of floor and wall panels by heat radiation, with a cavity floor (11 to 15), a wall front shell (17) and, integrated therein, at least one temperature-control band (24), which form in the floor and wall region a coherent, closed air-circulating duct system (14, 20, 21) which is separate from the room air. <IMAGE>
