Abstract (en)

[origin: EP0223902A1] 1. Building set for the production of a dry wall, consisting of at least two superposable building bricks (2) whereby each building brick has at least one bearing surface (3) which co-acts with the bearing surface of the corresponding other building brick, characterised in that the bearing surfaces (3, 4) have a plane and yet porous and/or partially soft surface (9, 10) so as to achieve a substantially flat seat in such a manner that the hard stone material (11) of one bearing surface (3 or 4 respectively) sealingly claws into the pores (12) and/or soft areas (13) of the corresponding other bearing surface (4 or 3 respectively).
