Abstract (en)

[origin: EP0224836A2] 1. A beating arm (1) for a rebound crusher or similar reducing machinery, the arm comprising a main body (2, 2A, 2B) mounted in the rotor (40, 40A) and a number of working tools (3, 3A) which extend along the length of the main body and have on their front surface a working edge also extending longitudinally, the working tools (3, 3A) being connectable to the main body (2, 2A, 2B) by at least one mounting bar (14, 15; 14A, 19) which extends parallel to the length of the main body, forms at least to some extent on the outside a railhead-like widening (16, 16A, 17) and engages in a correspondingly shaped groove, characterised in that the or each mounting bar (14, 15; 14A, 19) is disposed on the working tools (3, 3A) and the railhead-like widening (16, 16A, 17) is rounded substantially to a mushroom shape.
