Abstract (en)

[origin: US4825668A] A method and installation are provided for the treatment in an appropriate apparatus of bodies of textile material introduced into and/or removed from the apparatus by means of a material carrier on which the bodies are loaded, the treatment such as washing, bleaching, dyeing or similar being carried out with a fluid flowing through the bodies in a circuit flowing in and out of the apparatus by the bottom thereof and established by matching sealing means provided on the carrier and the apparatus.
