Abstract (en)

[origin: EP0225312A2] 1. A straightening device (4) for straightening warped doors or the like, comprising a tension rod (7) adapted to be clamped by means of a screw drive (7, 9) between two anchor members (5, 6) insertable in the door panel (1), characterised in that the tension rod is in the form of a screw rod (7) extending continuously from one anchor member (5) to the other anchor member (6), said screw rod engaging at one end, in one anchor member (5), in an axially immovable and relatively non-rotatable nut (8) and, at the other end, in the other anchor member (6), in an axially immovable but rotatable nut (9) accessible through a transverse slot (12) for the application of a spanner (13) or the like.
