Abstract (en)
[origin: US4800621A] A hinge includes a hinge arm which is snappable onto a mounting plate by means of an intermediate member. The intermediate member is at the front thereof engageable with the mounting plate and at the rear thereof provided with a pivot lever having a hook member by means of which the pivot lever and the intermediate member are lockable on the mounting plate. Centering elements include, for example, a locking bolt extending into a notch in the mounting plate or noses which abut on a base member of the mounting plate.
