Abstract (en)
[origin: EP0225825A1] The device comprises for the supply of at least one of its burners (2) an injector (8) and a gas supply tube (7) connected via one of its ends to a tap for switching off and/or regulating the flow. It is characterised in that the injector (8) has an opening (82) made to receive by insertion the other end of the tube (7) and a gasket (71), and in that the carcass comprises a support (16) provided with a housing (12), into which the injector is introduced, and in that a single piece (18) ensures the firm holding of the injector and simultaneously prevents the withdrawal of the tube from the gasket. <IMAGE>
