Abstract (en)

[origin: US4735154A] The invention involves a reinforced loading pallet and a processing for reinforcing same. Under the invention, with the pallet composed chiefly of two matching, superimposed panels each comprising a rigid framework equipped with ties channels are formed in some or all of the ties of at least one of the panels, and reinforcing rods (10) are inserted into said channels. The invention is applied notably to pallets for handling goods.

Abstract (fr)

L'invention se rapporte à une palette de chargement renforcée et à un procédé de renforcement d'une telle palette. Selon l'invention, la palette étant formée notamment de deux panneaux (2, 12) superposés complémentaires comprenant chacun une ossature (3, 13) rigide munie de traverses (4, 14 ... 44) de liaison, on ménage dans certains au moins des traverses de l'un au moins des panneaux des passages (9) dans lesquels on introduit des barres (10) de renforcement. L'invention s'applique notamment à des palettes de manutention.
