Abstract (en)
The subject of the present invention is a ring for locking a cover onto a fibre cask and the like, which has the peculiarity of comprising a metal profile strip (1,1 min) which can be disposed in a ring, to the ends of which can be coupled a clamping element (3,3 min). There are further provided interfitting means constituted by tongues or projections (6,6 min) which can be inserted into slots (2,2 min) defined at the ends of the said profile strip (1,1 min) and supported by attachment base members (5,15,16) of the said clamping element (3,3 min) to obtain coupling of the clamping element (3,3 min) to the profile strip (1,1 min).
