Abstract (en)

A built-up sectional beam for the erection of load-bearing or non-load bearing walls, more particularly load-bearing inside walls and inside cavity walls, characterized by its construction comprising a core (1) made from wood, the direction of the grain of which extends perpendicularly to the longitudinal axis (4) of the sectional beam and in the plane (5) of the wall (6) to be erected therefrom, with a finishing layer (2) on one or both sides, more particularly a wooden or plastic strip. Walls erected with such sectional beam.
