Abstract (en)
[origin: EP0226970A1] 1. System of land mines with remotely controllable mines (12) containing both a signal receiver (15) and a signal conductor (13) disposable along several mines (12), which conductor is coupled with the signal receivers (15) of the mines (12), characterised in that signal conductor (13) and mine (12) are not connected directly with one another, that the signal conductor (13) emits electromagnetic waves at least from sections and that the signal receivers (15) are so constituted for signal receipt without wires that their reception region is limited to the very short range of less than 100 cm, preferably less than 50 cm.
