Abstract (en)

1. An absorbent cotton pad consisting of strengthened cotton fibers and/or viscose fibers, characterized by : admixture of synthetic fusible fibers ; said synthetic fusible fibers being uniformly distributed throughout the entire volume of said absorbent cotton pad ; and said synthetic fusible fibers being bonded to the adjacent fibers by fusion of said synthetic fusible fibers, at least at their surface, in a pressureless manner.

Abstract (de)

Zur Vermeidung des Flusens von Wattetupfern wird vorgeschlagen, der aus Baumwoll- und ggf. Viskosefasern bestehenden Watte synthetische Schmelzfasern beizumischen, die durch zumindest oberflächliche drucklose Aufschmelzung mit den benachbarten Fasern verbunden sind. Dieses wird vorzugsweise durch einen homogen auf die Watte einwirkenden Heissluftstrom erreicht.
