Abstract (en)
[origin: EP0228301A2] A printing paper for hard copy sublimation transfer comprises a substrate and a dye acceptor layer formed on a surface of the substrate, the dye acceptor layer being formed of a resin layer mainly composed of a resin having bisphenol units, and the resin forming the resin layer having a glass transition point not lower than 55 DEG C. The dye acceptor layer may be a single layer, or it may have a multi-layer structure with the top layer including the resin having bisphenol units.
