Abstract (en)
[origin: WO8700164A1] An additional load used to transmit the ignition of an ignition load to an explosive propulsion load is a compact moulded body obtained from a mass comprising as essential component nitrocellulose in fibre form. The moulded body is hardened by addition to the mass of a binder or by surface gelatinization.

Abstract (fr)
Une charge additionnelle servant à transmettre l'allumage d'une charge d'amorçage à une charge propulsive explosive est un corps moulé compact issu d'une masse comportant comme constituant essentiel de la nitrocellulose sous forme fibreuse. Le corps moulé est durci par addition à la masse d'un liant ou par gélatinisation en surface.
