Abstract (en)
[origin: EP0229015A2] 1. A door or window wing made of wood, wood chip material, or a material suitable to be processed by wood working tools and consisting of laminated plates (16, 18, 20) which extend parallel to the door leaf (11) and include strip-shaped inserts (22) of metal, especially aluminum, oriented perpendicularly with respect to the door leaf (11) and extending vertically at least approximately for the full height of the door or window wing, characterized in that, in horizontal section, the inserts (22, 22', 22'') have outer surfaces which, at least in part, are of sawtooth shape, that at both sides of the contact surfaces between the plates the inserts (22, 22', 22'') fit precisely and are cemented in blind cuts (32) provided in the plates (16, 18, 20).
