Abstract (en)
[origin: EP0229580A1] The ballot box (1) consists of a bottom container (2) formed by a box made of cardboard or a light laminated material or a similar material capable of being folded. The box is surmounted by a lid (3) also made by folding a sheet of the same material. The ballot box (1) has means for locking the lid (3) to the container (2). The locking is achieved by a special type of folding made along the edge of the lid (3). Application more particularly to the running of elections in public places. <IMAGE>
