Abstract (en)
[origin: EP0229740A2] One or more projecting parts (15) are produced in a single piece with the masonry block over at least one of its faces and comprising a cell (16) which opens outwards in order to permit the attachment of a fixing means (19) of an attached cladding element. The projecting parts (15) preferably extend over the entire height of the block and are disposed so as to be staggered, with access to the cells (16) open at the top when the masonry blocks (10) are assembled, with offsetting of one half element from one row to the next.
