Abstract (en)

[origin: WO8601762A1] A hand-operated sanding or polishing tool, consisting of a continuous sanding or polishing strip (6) which is tensioned over an essentially flat section, which has at least one folded leg (1). The leg or legs (1) are arranged to have spring action in relation to the essentially flat section, so that the sanding or polishing strip (6) is held under tension. The spring material can be made of strip steel or elastomers. An elastic intermediate layer in the form of an endless strip (9) can be arranged between the sanding or polishing strip (6) and the tool body.
