Abstract (en)
[origin: WO8700443A1] To prevent the detachment of the ski-boot in the case of ski bindings which, when released, allow the ski-boot to come free by outward pivoting of the sole fixing means, the latter are pressed into one or several recesses in the ski binding in the event of being released.

Abstract (fr)
Afin d'empêcher le détachement de la chaussure de ski des fixations qui, après déclenchement, permettent le dégagement de la chaussure par pivotement vers l'extérieur des éléments de serrage de la semelle, ces éléments sont enfoncés dans un ou plusieurs logements de la fixation en cas de déclenchement.
