Abstract (en)
[origin: EP0230797A1] The present application relates to a radiant burner comprising a screen (5) and a radiant panel (4) enveloped by a peripheral surround (1), associated with a body (2) delimiting the pre-mixing chamber. According to the invention, there is provided, bearing against an upper flange of the surround (1), a ceramic frame (7) having an internal peripheral structure (7a) which makes it possible to support the grill (5). <IMAGE>
