Abstract (en)
1. Device for the display of articles with a plurality of walls joined together, of which at least one is a plate made from a transparent material, and with fixing elements for connecting the plate to the other walls and parts of the device and/or for holding supplementary devices, wherein one or more regions of the plate or plates are rendered opaque, characterized in that the plate (2) or the plates are jointed together with the remaining walls to a self-supporting construction by the fixing elements (3), which are provided on the inside of the plate or plates solely in these opaque regions (2a, 2b; 2c).
