Abstract (en)

[origin: EP0232101A2] A light-sensitive silver halide color photographic material having at least one light-sensitive silver halide emulsion layer containing a pyrazolotriazole type magenta coupler and a colored magenta coupler, wherein the layer containing the pyrazolotriazole type magenta coupler and the colored magenta coupler comprises 17 mole % or more of said colored magenta coupler based on the amount of all couplers in the layer. According to this invention, provided is a light-sensitive silver halide color photographic material having been improved in sharpness and graininess.
