Abstract (en)
[origin: EP0232668A1] A device for covering and uncovering holes or any other similar structures (6) intended to be covered by tarpaulins (2) to (5) and comprising a modifiable assembly (14) of tarpaulins comprising at least one tarpaulin (2, 21) on each side (16, 17) of the transverse median plane (15) of this modifiable assembly (14), the tarpaulin or tarpaulins (2, 3, 4, 5...) on one side (16) of the transverse median plane (15) following a path (18) in a direction contrary to that (19) of the tarpaulin or tarpaulins (21, 31, 41, 51...) of the other side (17) of this transverse median plane (15), and two motors (39, 40) located, respectively, on each lateral side (37, 38) of the hole or of the structure (6), each of the motors (39, 40) driving, during the covering stage, the set of reels (29, 30, 31, 32) located on one side (16) of the transverse median plane (15) or driving, during the uncovering stage, the set of drums (201, 211, 221, 231) located on the other side (17) of the transverse median plane (15). <IMAGE>
