Abstract (en)
[origin: EP0232774A1] 1. Image pick-up tube with a front disc (6) which is coated on its rear side with a transparent, electrically conductive layer (3) which is connected with a photoconductor (4), the acceptance of the signal current taking place by means of a contact (7a) which passes through the front disc (6) and is guided to the layer (3), characterised in that the contact (7a) lies in a right-angled channel in the front disc, the one end of which channel ends at the side of the front disc (6) and the other end of which channel ends at the layer (3).
