Abstract (en)

[origin: EP0232900A2] The removable grate has on its charging side a charging door for the introduction of solid fuels for grateless combustion and above this charging door a further charging door for the introduction of solid fuels for combustion with a grate. The region of the combustion chamber between the two charging doors forms the combustion chamber for a grate which can be introduced through the charging door for the introduction of solid fuels for grateless combustion, this region having projections for receiving the grate. <IMAGE>
