Abstract (en)

[origin: US4804827A] An identity card, on which a printing area is to be electrostatically printed, consists of a two-layer paper laminate in which the adhesive layer joining the two layers is colored. The paper laminate is calendered and has a thickness of approximately 0.3 mm and a weight per unit area of approximately 300 g/m². Both surfaces are provided with a pigment layer and a varnish made of a reticulated acrylate varnish, which each leave a printing area open.
