Abstract (en)
[origin: EP0233446A2] 1. Hollow moulded block for the erection of a masonry structure or the like which, apart from the load-bearing functions, also serves for the insulation of heat and sound, having a number of openings, which run parallel to the narrow sides and in straight lines in each case from one side face to the opposite side face, characterized in that the openings have an unsymmetrical distribution both with regard to their arrangement and also with regard to the dimensions of their cross-sections.
