Abstract (en)

[origin: EP0233530A1] The invention relates to a mouthpiece (2) for a cigarette or the like, in particular a ventilated unfiltered cigarette, substantially comprising a cylindrical sleeve (3) to be attached to an end of the tobacco rod (6) which is wrapped in paper (5), said sleeve having an external diameter substantially corresponding to that of the wrapped tobacco rod, in which sleeve a support member (4) provided with ribs (9) is arranged, whose ribs extend substantially in the longitudinal direction of the sleeve and are supported in each case at their outer edge on the inside wall of the sleeve, each of the ribs consisting of at least two layers (F1, F2) (F3, F4) of a web-shaped material, at least one layer (F2) of one rib in each case being connected to at least one layer (F3) of another rib (Fig. 1).
